

MARINE RADIO COURSE

NEED YOUR MARINE VHF LICENSE?

Anyone operating a marine VHF radio is required to hold a marine VHF license. Cockburn Sea Rescue offers training to both volunteer crew and the general boating public. We offer both the Long Range Operators Certificate of Proficiency (LROCP) and the Short Range Operators Certificate of Proficiency (SROCP).

The SROCP is particularly suited to recreational boat users and the content has been packaged into a highly practical and informative course. Our experienced invigilators draw on many years of sea rescue experience and are there to support you even after the course has finished.

Participants will use our radio operations centre to make and receive calls in a real world environment - from distress to simply logging your voyage. Our aim is to ensure participants are comfortable and confident in radio protocols and technique.

Contact us for further information or visit our website for upcoming courses.
